LEADERS IN PAINTING SERVICES SINCE 1997

PROFILE DOCUMENT

Leaders since 1997

Premier Painting have been providing leading painting services across strata, Government and general commercial industries since 1997. With a sharp eye for detail, our experienced team have a reputation of taking great care and attention with first-class quality workmanship.

Our winning formula for over 20 years ensures that a client-focused approach is at the forefront of every decision made within our organisation. With a dedicated Project Manager and Supervisor on every project, our clients are guaranteed that the intricacies are planned out and taken into consideration.

From the repaint of your interior and exterior areas of your strata building, to the maintenance paint works of museums, halls and schools as well as our cost effective and less intrusive rope access services, let Premier Painting's award-winning team manage the process for you.

Awards & Accreditations

Overview

With a highly skilled team, from our leadership right through to our Supervisors and professionally qualified Painters, Premier Painting have a strong focus across commercial, strata and rope access related works.

From common areas in strata residential blocks through to hotels in the commercial sector and multi-storey high-rise tower blocks that require an expert rope access service, our extensive experience in strata, commercial and rope access puts our clients at ease and ensures a job of the highest standard.

We offer our esteemed clientele a superior offering ensuring a high-quality finish for any environment, asset or building.

Commercial Facilities

Our strong focus to health and safety, creating confidence, value and sustainability means that we are regularly chosen by many of the most respected and most prestigious organisations, Building and Facility Managers as well as Government establishments, to be their painting service supplier of choice within the commercial sector.

We work across the following industries within the commercial space:

- Government and Heritage
- Transport, Airports and Logistics
- Education
- Health, Aged Care and Child Care Facilities
- Commercial and Retail Spaces
- Recreational Facilities

Some of the work we do within the commercial sector includes maintenance painting, conventional water based, oil-based and solvent based paint systems, texture coating and membrane applications as well as graffiti removal and line marking.

Strata

With the constant use of interior and exterior areas within a strata building including common areas such as lift foyers and car parks, the requirements of regular painting maintenance become essential to the overall value of the asset.

To ensure regular upkeep of the building, Premier Painting will create a maintenance schedule to deliver an environment that always looks in pristine condition. We are often enlisted by strata management teams from our reputation on delivering on each and every project with quality assurance, safety and budget controls deeply engrained in our proven management process.

We value our relationships with key stakeholders to deliver a high level of service in line with the relevant strata laws and regulations.

With assigning a dedicated Project Manager and Supervisor as well as only using in-house professionally qualified Painters on each project, the Premier Painting brand is a guarantee for quality assurance.

Abseiling

With a big part of our painting services having been delivered via rope access, Premier Painting can deliver cost effective and less intrusive services to commercial and strata difficult to access areas. Whether it be building remedial works, repairs and maintenance through to multi-story high rise window cleaning, our new offering follows the same winning formula of our experienced team delivering a client focused approach. It is what has made Premier Painting a leader in our field for over 20 years.

From exterior multi-story high rise tower blocks, churches and bridges to interior hard to reach overhangs, mezzanines or stairways in shopping malls, museums and schools, our rope access service utilises innovative and effective industrial rope access techniques to gain access to high and difficult to reach surfaces.

As we do across of all of our services, our rope access offering provides a dedicated Project Manager and Supervisor on every project. With extensive experience across commercial, strata and Government, you can be rest assured the safety of your asset, your teams and our teams are paramount.
